PROFESSIONAL EXPERIENCE

Mobioxy Solution Pvt. Ltd. – Internship   Ahmedabad / Gujarat
React Developer   *12/2023-present*

Contributing to the development of responsive web applications using React.js, integrating APIs, managing application state, and ensuring high-quality, scalable solutions in collaboration with the development team.

- **InsightIQ AI Error Resolution**
  InsightIQ is a platform designed for social media users, built using React.js. I contributed to improving the platform by identifying and resolving various errors, enhancing performance and delivering a better user experience.
- **Hotel Management System**
  Developed a hotel management application using React.js and its ecosystem. The system streamlines customer management, room allocation, and booking processes, ensuring a user-friendly interface for efficient hotel operations.
- **Edex Education Platform**
  Edex is an e-learning platform built with React.js and Firebase as the backend. The platform features locked content accessible only through a subscription, implemented using the Razorpay payment gateway. Edex delivers a seamless and intuitive user experience for learners.
- **Dailoz Task Manager**
  Designed and developed **Dailoz**, a task management web application for Mobioxy Solution Pvt. Ltd., using React.js and Firebase. Key features include user authentication, real-time data synchronization, and efficient task tracking, all integrated into a responsive and engaging user interface.

Bizzappdev System Pvt. Ltd. - Internship   Ahmedabad / Gujarat
Odoo Developer   *07/2023–12/2023*

As an Odoo Developer at Bizzappdev System Pvt. Ltd., I played a key role in developing and customizing Odoo ERP solutions tailored to the needs of the automotive services industry. My responsibilities developing a comprehensive module that streamlined operational workflows and enhanced overall business efficiency.

Automotive Service Using Odoo

- Developed an appointment management system enabling customers to schedule car services on their requested date.
- Designed a user-friendly interface listing various service options available on the appointment page.
- Implemented an automated mechanic assignment system based on service type and availability.
- Streamlined post-service operations by integrating multiple payment options for customer convenience.
- Enhanced operational efficiency by automating workflows from appointment booking to payment processing.
